FOREWORD.....	v
SUMMARY	S-1
1 INTRODUCTION.....	1-1
1.1 Background	1-1
1.2 Proposed Action	1-6
1.3 Alternatives to the Proposed Action.....	1-6
1.4 Associated Actions.....	1-6
2 PURPOSE AND NEED FOR ACTION	2-1
3 PROPOSED ACTION AND ALTERNATIVES.....	3-1
3.1 No-Action Alternative.....	3-2
3.1.1 L-Lake	3-3
3.1.2 SRS Streams	3-3
3.1.3 Par Pond.....	3-3
3.2 Shut Down and Deactivate the River Water System.....	3-4
3.2.1 L-Lake	3-4
3.2.2 SRS Streams	3-5
3.2.3 Par Pond.....	3-5
3.3 Proposed Action - Shut Down and Maintain the River Water System	3-5
3.3.1 Potential Decisions To Restart The River Water System.....	3-6
3.3.1.1 Pump to Par Pond.....	3-6
3.3.1.2 Refill L-Lake	3-7
3.3.1.3 Support New Missions	3-7
3.3.2 Layup Options	3-8
3.3.2.1 Restart in 1 Month.....	3-9
3.3.2.2 Restart in 6 Months	3-9
3.3.2.3 Restart in 12 Months	3-10
3.3.2.4 Restart in 30 Months	3-10
3.3.2.5 Additional Costs to Support Use of the River Water System for Accelerator Production of Tritium	3-11
3.3.3 Additional Costs for the Shutdown and Maintain Alternative	3-12
3.4 Comparison of Environmental Impacts	3-12

TABLE OF CONTENTS (continued)

<u>Section</u>		<u>Page</u>
4	AFFECTED ENVIRONMENT AND ENVIRONMENTAL IMPACTS.....	4-1
4.1	L-Lake	4-2
4.1.1	Geology and Soils.....	4-4
4.1.1.1	Affected Environment.....	4-4
4.1.1.2	Environmental Impacts	4-16
4.1.1.2.1	No Action	4-17
4.1.1.2.2	Shut Down and Deactivate	4-17
4.1.1.2.3	Shut Down and Maintain.....	4-17
4.1.2	Surface Water	4-17
4.1.2.1	Affected Environment.....	4-17
4.1.2.2	Environmental Impacts	4-21
4.1.2.2.1	No Action	4-21
4.1.2.2.2	Shut Down And Deactivate	4-21
4.1.2.2.3	Shut Down and Maintain.....	4-24
4.1.3	Groundwater	4-24
4.1.3.1	Affected Environment.....	4-24
4.1.3.2	Environmental Impacts	4-31
4.1.3.2.1	No Action	4-31
4.1.3.2.2	Shut Down and Deactivate	4-31
4.1.3.2.3	Shut Down and Maintain.....	4-31
4.1.4	Air Resources	4-31
4.1.4.1	Affected Environment.....	4-31
4.1.4.1.1	Climate and Meteorology	4-31
4.1.4.1.2	Existing Radiological Conditions.....	4-35
4.1.4.1.3	Nonradiological Ambient Air Concentrations	4-36
4.1.4.2	Environmental Impacts	4-36
4.1.4.2.1	No Action	4-36
4.1.4.2.2	Shut Down and Deactivate	4-36
4.1.4.2.3	Shut Down and Maintain.....	4-38
4.1.5	Ecology	4-38
4.1.5.1	Affected Environment.....	4-38
4.1.5.1.1	Terrestrial Ecology	4-39
4.1.5.1.2	Aquatic Ecology	4-42
4.1.5.1.3	Wetlands Ecology.....	4-47

TABLE OF CONTENTS (continued)

<u>Section</u>		<u>Page</u>
	4.1.5.2 Environmental Impacts	4-51
	4.1.5.2.1 No Action	4-51
	4.1.5.2.2 Shut Down and Deactivate	4-52
	4.1.5.2.3 Shut Down and Maintain.....	4-56
4.1.6	Land Use.....	4-56
	4.1.6.1 Affected Environment.....	4-56
	4.1.6.2 Land Use Impacts.....	4-58
	4.1.6.2.1 No Action	4-58
	4.1.6.2.2 Shut Down and Deactivate	4-58
	4.1.6.2.3 Shut Down and Maintain.....	4-58
4.1.7	Aesthetics.....	4-59
	4.1.7.1 Affected Environment.....	4-59
	4.1.7.2 Aesthetic Impacts.....	4-59
	4.1.7.2.1 No Action	4-59
	4.1.7.2.2 Shut Down and Deactivate	4-59
	4.1.7.2.3 Shut Down and Maintain.....	4-66
4.1.8	Occupational and Public Health	4-66
	4.1.8.1 Affected Environment.....	4-66
	4.1.8.1.1 Public Health	4-66
	4.1.8.1.2 Occupational Health	4-71
	4.1.8.2 Environmental Impacts	4-75
	4.1.8.2.1 No Action	4-76
	4.1.8.2.2 Shut Down and Deactivate	4-83
	4.1.8.2.3 Shut Down and Maintain.....	4-88
4.2	SRS Streams	4-89
4.2.1	Geology and Soils.....	4-89
	4.2.1.1 Affected Environment.....	4-89
	4.2.1.2 Environmental Impacts	4-91
	4.2.1.2.1 No Action	4-91
	4.2.1.2.2 Shut Down and Deactivate	4-91
	4.2.1.2.3 Shut Down and Maintain.....	4-91

4.2.2	Surface Water	4-91
4.2.2.1	Affected Environment.....	4-91
4.2.2.2	Environmental Impacts	4-106
4.2.2.2.1	No Action	4-106
4.2.2.2.2	Shut Down and Deactivate	4-106
4.2.2.2.3	Shut Down and Maintain.....	4-107
4.2.3	Groundwater	4-107
4.2.3.1	Affected Environment.....	4-107
4.2.3.2	Environmental Impacts	4-107
4.2.3.2.1	No Action	4-107
4.2.3.2.2	Shut Down and Deactivate	4-107
4.2.3.2.3	Shut Down and Maintain.....	4-107
4.2.4	Air Resources	4-107
4.2.4.1	Affected Environment.....	4-107
4.2.4.2	Environmental Impacts	4-108
4.2.4.2.1	No Action	4-108
4.2.4.2.2	Shut Down and Deactivate	4-108
4.2.4.2.3	Shut Down and Maintain.....	4-108
4.2.5	Ecology.....	4-108
4.2.5.1	Affected Environment.....	4-108
4.2.5.1.1	Terrestrial Ecology	4-108
4.2.5.1.2	Aquatic Ecology	4-108
4.2.5.1.3	Wetland Ecology	4-111
4.2.5.2	Environmental Impacts	4-115
4.2.5.2.1	No Action	4-115
4.2.5.2.2	Shutdown and Deactivate	4-119
4.2.5.2.3	Shutdown and Maintain.....	4-119
4.2.6	Land Use.....	4-119
4.2.6.1	Affected Environment.....	4-119
4.2.6.2	Land Use Impacts.....	4-119
4.2.6.2.1	No Action	4-119
4.2.6.2.2	Shut Down and Deactivate	4-119
4.2.6.2.3	Shut Down and Maintain.....	4-119

4.2.7	Aesthetics.....	4-120
4.2.7.1	Affected Environment.....	4-120
4.2.7.2	Aesthetic Impacts.....	4-120
4.2.7.2.1	No Action	4-120
4.2.7.2.2	Shut Down and Deactivate	4-120
4.2.7.2.3	Shut Down and Maintain.....	4-120
4.2.8	Occupational and Public Health	4-120
4.2.8.1	Affected Environment.....	4-120
4.2.8.1.1	Public Health	4-120
4.2.8.1.2	Radioactive Releases of Cesium-137 to Onsite Streams.....	4-124
4.2.8.1.3	Radiation Levels in Steel Creek	4-124
4.2.8.2	Environmental Impacts	4-124
4.2.8.2.1	No Action	4-125
4.2.8.2.2	Shut Down and Deactivate	4-125
4.2.8.2.3	Shut Down and Maintain.....	4-127
4.3	Par Pond	4-128
4.3.1	Geology and Soils.....	4-130
4.3.1.1	Affected Environment.....	4-130
4.3.1.1.1	Stratigraphy	4-130
4.3.1.1.2	Soils	4-131
4.3.1.2	Environmental Impacts	4-131
4.3.1.2.1	No Action	4-131
4.3.1.2.2	Shut Down and Deactivate	4-131
4.3.1.2.3	Shut Down and Maintain.....	4-131
4.3.2	Surface Water	4-131
4.3.2.1	Affected Environment.....	4-131
4.3.2.1.1	Water Quality	4-131
4.3.2.1.2	Water Quantities	4-133
4.3.2.1.3	Water Usage	4-133
4.3.2.2	Environmental Impacts	4-134
4.3.2.2.1	No Action	4-134
4.3.2.2.2	Shut Down and Deactivate	4-135
4.3.2.2.3	Shut Down and Maintain.....	4-135

TABLE OF CONTENTS (continued)

List of Tables

<u>Table</u>		<u>Page</u>
S-1	Characteristics of the alternatives	S-5
S-2	Comparison of the impacts of the alternatives for the River Water System	S-6
1-1	Discharges of river water to onsite streams	1-5
1-2	Water requirements for No-Action and shutdown alternatives	1-8
3-1	Maintenance and restart costs of layup options-base case.....	3-9
3-2	Cumulative costs to lay up, restart and operate the River Water System	3-11
3-3	Additional cost to maintain R-Normal Line and 125,000 gallon-per-minute pumping capacity	3-11
3-4	Costs for various remedial options in accordance with the Federal Facility Agreement.....	3-12
3-5	Characteristics of the alternatives	3-13
3-6	Comparison of the impacts of the alternatives for the River Water System	3-14
4-1	Water table aquifer.....	4-29
4-2	First confined aquifer	4-29
4-3	Monthly precipitation amounts for the Savannah River Site.....	4-33
4-4	Average gross alpha and gross beta measured in air, 1990-1995	4-35
4-5	Maximum ground-level concentrations of nonradiological air constituents at the Savannah River Site boundary under the Shut Down and Deactivate Alternative....	4-37
4-6	Maximum ground-level concentrations of radiological air constituents at the Savannah River Site boundary under the Shut Down and Deactivate Alternative	4-38
4-7	Number of amphibian and reptile species collected from Steel Creek and lower reaches of L-Lake before and after the creation of L-Lake	4-40
4-8	Relative abundance of L-Lake fish species, 1986 through 1995	4-45
4-9	Wetland community types occurring in the Steel Creek corridor	4-48
4-10	Aquatic macrophyte coverage of L-Lake, 1996	4-51
4-11	Population distribution in 1996 within 50-mile radius of the Savannah River Site	4-69
4-12	External radiation levels at Savannah River Site facilities.....	4-70
4-13	Maximum measurements of radionuclides in soil for 1995	4-71
4-14	Average concentration and inventory of radionuclides and metals in L-Lake sediments.....	4-72
4-15	Average surface water concentrations of radionuclides and metals in L-Lake	4-74
4-16	Savannah River Site annual individual and collective radiation doses, 1988-1995	4-75
4-17	Radiological doses associated with the No-Action Alternative and resulting health effects to the public	4-80

TABLE OF CONTENTS (continued)

List of Tables

<u>Table</u>		<u>Page</u>
4-18	Nonradiological hazard index associated with the No-Action Alternative for members of the public	4-81
4-19	Worker radiological doses associated with the No-Action Alternative and resulting health effects	4-82
4-20	Worker nonradiological hazard indexes and cancer risks associated with the No-Action Alternative	4-83
4-21	Radiological doses associated with the Shut Down and Deactivate Alternative and resulting health effects to the public	4-85
4-22	Nonradiological hazard index and cancer risks associated with the Shut Down and Deactivate Alternative for members of the public	4-86
4-23	Worker radiological doses associated with the Shut Down and Deactivate Alternative and resulting health effects	4-87
4-24	Worker nonradiological hazard indexes and cancer risks associated with the Shut Down and Deactivate Alternative.....	4-88
4-25	Discharges to onsite streams	4-92
4-26	Total flows and tritium concentrations in onsite streams	4-92
4-27	Flow summary for Pen Branch	4-93
4-28	Pen Branch field data	4-95
4-29	Pen Branch physical characteristics and general chemistry	4-96
4-30	Flow summary for Fourmile Branch.....	4-98
4-31	Fourmile Branch field data	4-98
4-32	Fourmile Branch physical characteristics and general chemistry	4-99
4-33	Water quality data for Steel Creek (November 1985-December 1991)	4-101
4-34	Flow summary for Steel Creek	4-102
4-35	Lower Three Runs field data.....	4-104
4-36	Lower Three Runs physical characteristics and general chemistry	4-104
4-37	Flow summary for Lower Three Runs (cubic feet per second)	4-106
4-38	Reactor-area discharges to Steel Creek	4-112
4-39	Steel Creek stream characteristics	4-112
4-40	Wetland community types occurring in the Steel Creek corridor below L-Lake dam	4-113
4-41	Wetland community types occurring in the Steel Creek delta	4-114
4-42	Aquatic macrophyte coverage of the Steel Creek corridor and delta, 1996	4-115
4-43	Average water concentrations of radioactivity in the Savannah River and Savannah River Site streams for 1995.....	4-123

TABLE OF CONTENTS (continued)

List of Tables

<u>Table</u>		<u>Page</u>
4-44	Measurements of radionuclides in the Savannah River and Savannah River Site stream sediments for 1995	4-123
4-45	Releases of cesium-137 to onsite streams from reactor operation	4-124
4-46	Worker radiological doses associated with the Shut Down and Deactivate Alternative and resulting health effects	4-126
4-47	Worker nonradiological, noncarcinogenic hazard indexes and cancer risk associated with the Shut Down and Deactivate Alternative	4-127
4-48	Water quality parameters for Par Pond near the dam (January 1990-December 1991)..	4-132
4-49	Inflow and outflow terms.....	4-134
4-50	Maximum ground-level concentrations of nonradiological air constituents at the Savannah River Site boundary under the No-Action Alternative.....	4-136
4-51	Maximum ground-level concentrations of nonradiological air constituents at the Savannah River Site boundary under the Shut Down and Deactivate Alternative.....	4-138
4-52	Maximum ground-level concentrations of radiological air constituents at the SRS boundary under the Shut Down and Deactivate Alternative	4-139
4-53	Threatened and endangered plant and animal species of the Savannah River Site	4-144
4-54	Mercury concentrations in largemouth bass	4-152
4-55	Average concentrations and inventory of radionuclides and metals in Par Pond sediments.....	4-163
4-56	Radiological doses and resulting impacts associated with the No-Action Alternative and resulting health effects to the public	4-163
4-57	Nonradiological, noncarcinogenic hazard index associated with the No-Action Alternative for members of the public.....	4-164
4-58	Worker radiological doses associated with the No-Action Alternative and resulting health effects	4-164
4-59	Worker nonradiological hazard indexes associated with the No-Action Alternative	4-165
4-60	Combined radiological doses and resulting impacts associated with the No-Action Alternative and resulting health effects to the public	4-167
4-61	Combined nonradiological hazard indexes and cancer risk associated with the No-Action Alternative for members of the public.....	4-168
4-62	Combined worker radiological doses and resulting impacts associated with the No-Action Alternative	4-169
4-63	Combined worker nonradiological hazard indexes and cancer risks associated with the No-Action Alternative.....	4-170
4-64	Combined radiological doses associated with the Shut Down and Deactivate Alternative and resulting health effects to the public	4-171

TABLE OF CONTENTS (continued)

List of Tables

<u>Table</u>		<u>Page</u>
4-65	Combined nonradiological hazard index and cancer risks associated with the Shut Down and Deactivate Alternative for members of the public.....	4-172
4-66	Combined worker radiological doses associated with the Shut Down and Deactivate Alternative and resulting health effects	4-172
4-67	Combined worker nonradiological hazard indexes and cancer risks associated with the Shut Down and Deactivate Alternative.....	4-173
4-68	General racial characteristics of population in the Savannah River Site region of interest	4-174
4-69	General poverty characteristics of population in the Savannah River Site region of interest	4-175
4-70	Annular sector factors for local dose evaluations.....	4-180
4-71	Estimated per capita annual dose for identified communities in 80-kilometer region....	4-181
4-72	Cumulative maximum Savannah River Site boundary line ground-level concentrations for PM ₁₀ and air toxics	4-185
4-73	Estimated maximum annual cumulative radiological doses and resulting health effects to offsite population and facility workers	4-186
4-74	Irreversibly or irretrievably committed resources	4-189
5-1	River Water System components subject to remedial action under the Federal Facility Agreement.....	5-4
5-2	National Pollutant Discharge Elimination System Permit Number SC0000175 outfalls.....	5-7

4-1	L-Lake and environs	4-3
4-2	General location of Savannah River Site and its relationship to geologic provinces of southeastern United States	4-5
4-3	Topographic map L-Lake/Par Pond area	4-6
4-4a	Generalized geologic cross section from Fourmile Branch to L-Lake	4-7
4-4b	Generalized geologic cross section from L-Lake to Par Pond	4-8
4-5	Comparison of lithostratigraphy and hydrostratigraphy for the Savannah River Site region	4-10
4-6	Soils Horizons - L-Lake, upper Steel Creek, and Pen Branch	4-12
4-7	Soils Horizons - lower Steel Creek	4-13
4-8	Soils Horizons on west side of Par Pond	4-14
4-9	Soils Horizons - Lower Three Runs	4-15
4-10	Hydrogeologic cross-section	4-25
4-11	Potentiometric surface of the water table aquifer, L-Lake/Par Pond area	4-27
4-12	Potentiometric surface of the first confined aquifer (Gordon Aquifer), April-May 1992	4-28
4-13	Groundwater contamination at the Savannah River Site	4-30
4-14	Wind rose for the Savannah River Site, 1987 through 1991	4-34
4-15	View of L-Lake/Steel Creek from north side of Road B	4-60
4-16	View of L-Lake from boat ramp on west side of L-Lake	4-61
4-17	View of L-Lake from road across the dam at south end of lake	4-62
4-18	Artist's rendering of L-Lake/Steel Creek from Road B at partial pool	4-63
4-19	Artist's rendering of receding L-Lake from boat ramp	4-64
4-20	Artist's rendering of receding L-Lake from top of the dam	4-65
4-21	Major sources of radiation exposure in the vicinity of the Savannah River Site	4-68
4-22	Cesium-137 conservative 1995 isodose contours	4-73
4-23	Public exposure pathways	4-77
4-24	Worker exposure pathways	4-78
4-25	Surface water features at the Savannah River Site showing water bodies that have received reactor effluent	4-90
4-26	Flow measurement sampling stations for Pen Branch	4-94
4-27	Flow measurement and water quality sampling stations on Fourmile Branch	4-97

TABLE OF CONTENTS (continued)

List of Figures

<u>Figure</u>		<u>Page</u>
4-28	Locations of Steel Creek water quality sampling stations as indicated by station numbers 275-370.....	4-100
4-29	Flow measurement and water chemistry sampling stations for Lower Three Runs.....	4-105
4-30	View of Lower Three Runs from just below the dam on Road B	4-121
4-31	View of Steel Creek from below the dam at L-Lake.....	4-122
4-32	Par Pond and environs showing full pool contour of 200 feet above mean sea level and the 195 foot contour	4-129
4-33	View of Par Pond looking north	4-157
4-34	View of Par Pond at full pool	4-158
4-35	View of Par Pond at reduced water level.....	4-159
4-36	Exposed sediment areas in Par Pond at the 58.8 meter level and the P- and R-Reactor water distribution system	4-161
4-37	Atmospheric release locations	4-166
4-38	Distribution of people of color by census tract in the Savannah River Site region of analysis	4-176
4-39	Distribution of low-income census tract in the Savannah River Site region of analysis	4-177
4-40	Annular sectors around the Savannah River Site.....	4-179
4-41	Community distributed impacts.....	4-181
